

GTH Annual Service Contracts

Annual service for controllers, recorders, and other process instruments is vital to keep a plant running smoothly. Preventative maintenance allows you to detect problems before they impact production quality or cause costly shut downs.

There are a number of services available under GTH Service Contracts including instrument calibrations & repair. All service contracts can be customized to your company's schedule as well as the number of instruments and types of devices at your facility.

We service a range of instruments including:

- Chart & Video Recorders
- Temperature Controllers
- Transmitters
- Gas Meters
- And more!

The George T. Hall Company is here to help you keep your facility running at its best. *Please contact your local representative today to schedule service or for more information on how our annual service contracts can save you time and money!*
