

## Why should you choose a certified panel shop?

Your customers expect quality from your company and your products, you should expect the same from your control panel supplier. Using a certified control panel shop guarantees a high level of workmanship, trained personnel, and documented quality control processes.

### qual-i-ty

*/'kwälədē/* noun

The standard of something as measured against other things of a similar kind; the degree of excellence of something.

At GTH we take pride in the quality of our work. Whether large or small, we design, build, and quality test our panels to meet or exceed industry standards for safety and functionality. We have two UL listed panel shops to serve you in California and Nevada, as well as a team of field personnel in both locations who are qualified to assist through the installation, testing, commissioning, and startup of each panel.

The GTH advantage:

- CSIA certification
- UL listing - 508A and 698A
- Components sourced from leading manufacturers
- Machine-produced marking systems for wires and terminals
- Strict Quality Control processes
- Compliance auditing
- Calibrated instrument
- Field services

**Tight delivery requirements?** *We offer expedite options to meet your deadlines.*

**New or inexperienced operators?** *We offer onsite control systems training to optimize your process efficiencies.*

**Have your own components?** *We are happy to design and build your control panel using the components you supply.*

**OEM or high volume requirements?** *We offer competitive quantity based pricing as well as staged delivery.*

Contact your local [GTH office](#) today for more information on how we can assist you!
